ICASA Certification Number:	TA-2007/1048

Product Approval Reference Number:

MULTENET 7/11/2008

Technical Product Manager

Consumer Operations Manager

Richard Ngoma

Kumarin Vandayar

The approval indicates that there were no known incompatibilities between the approved product and the MTN network at the time of issue. This certificate does not endorse the approved product. This certificate is issued based on the current implementation of the product approved herein, and shall not be applicable should any hardware modification, adjustment or enhancement be made to the product. In the case of any hardware modification, adjustment or enhancement, MTN would require the product to be re-issued for evaluation should a valid certificate be required. This approval is issued based on an evaluation undertaken on the abovementioned Network Infrastructure Software and the abovementioned Product Software Revision. In the event of a Product Software Revision update, or a Network Software Revision update, the results of the evaluation may become invalid which may necessitating a re-evaluation. This certificate when issued for product that uses an implementation of a GSM module, will have application to the module specifically, identifying the manufacturer of the GSM module in question.
